QUALITY MANAGEMENT POLICY

BERARDI – VIBOLT – VITMAN

OUR MISSION: MORE THAN JUST A SUPPLIER

Our business mission is to work with our clients to cut their overall procurement costs, developing our product range and innovative services that enable them to reduce the number of their suppliers. As a company, we strive to generate new work opportunities, creating a comfortable working environment that values the characteristics of each individual, leading to better personal satisfaction and a greater spirit of collaboration and commitment.

OUR VISION

We put in all our passion, and professionalism to save our clients the effort of managing their Cparts. We aim at becoming a point of reference on the market, trying to foresee its changing needs and adapt to them, with a forward-thinking approach that has always characterized Berardi, generation after generation.

QUALITY WITHOUT COMPROMISE

“Quality without compromise” is not a catchphrase, but a cornerstone of the company since its birth. We reduce the risk of defective products by selecting the best suppliers with audits, performed by our specialized personnel; we have equipped our quality laboratory with cutting-edge technology, which we constantly update with new tools and specialized training for our personnel. Our ISO 9001 certification is the hallmark of our commitment to constantly improving our quality management system, in order to meet the requirements of as many clients as possible.

With best regards,

Marco Latini

Quality Assurance Manager – Berardi Fasteners
